SUMMARY

Senior Backend Engineer with 6 years of experience building scalable Python micro-services and AI-powered pipelines. Proficient in FastAPI, LangChain, OpenAI APIs, PostgreSQL, and Kubernetes. Passionate about applying LLMs to real-world product challenges.

SKILLS

- Languages: Python (expert), TypeScript, SQL, Bash
- Frameworks: FastAPI, LangChain, LangGraph, Celery, SQLAlchemy
- AI/ML: OpenAI API, Embeddings, RAG pipelines, Pydantic validation
- Infrastructure: Docker, Kubernetes, GitHub Actions, AWS (ECS, RDS, S3)
- Databases: PostgreSQL, Redis, SQLite, Elasticsearch

WORK EXPERIENCE

Senior Backend Engineer — TalentAI Inc., San Francisco

March 2022 – Present

- Designed and led the AI recruitment pipeline using FastAPI + LangGraph, processing 10,000+ applications/month.
- Built a resume-parsing service with pdfplumber + LLM extraction, achieving 94% field accuracy.
- Implemented SSE-based real-time status streaming for recruiter dashboard, reducing page load wait by 60%.
- Introduced Pydantic v2 schemas across all API contracts, eliminating a class of runtime type errors.
- Mentored 3 junior engineers; ran weekly code-review sessions focused on async patterns and testing.

Backend Engineer — DataBridge Solutions, Seattle

July 2019 – February 2022

- Built RESTful microservices in Python/FastAPI serving 500K+ daily requests with 99.9% uptime.
- Migrated legacy Django monolith to an async FastAPI architecture; cut p95 latency by 45%.
- Designed ETL pipelines (Celery + PostgreSQL) processing 5M records nightly.
- Owned CI/CD setup on GitHub Actions; achieved < 8 min build-to-deploy cycle.

EDUCATION

B.Sc. Computer Science — University of Washington, Seattle

September 2015 – June 2019 | GPA 3.8 / 4.0

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2023)
- Certified Kubernetes Application Developer – CNCF (2022)
- Deep Learning Specialization – Coursera / deeplearning.ai (2021)
